

**Integrated Solutions Throughout the Food Supply  
To NOT Only Eliminate Waste**

**But to Reuse Nutrients to The Highest Value  
Economically & With The Highest Environmental Impact**

# Eggshell Waste

**Current National Volume** – 600,000 tons of egg shell waste annually approximately 90% landfilled

**It's not just a fertilizer**

**Shell = Calcium**

**Membrane = Collagen, fibrous proteins & various other nutrients**

Human use: topical & food ingredients	\$1000 to 2000 per ton
Pet/Animal Food	\$600 to 1000 per ton
Industrial Use	\$250 to 600 per ton
Soil Health	\$75 to 150 per ton

# New Uses for Eggshell Waste

**Soil applications to fend off bugs and give plants calcium<sup>11</sup>**

**Animal food additive for nutritional benefits<sup>11</sup>**

**Egg shell use as a drain cleaner**

**Egg shell membrane solution to relieve itchy skin and heal cuts<sup>11</sup>**

**Facial applications to get rid of acne, black heads, and other skin irritants<sup>11</sup>**

**Nutritional substance for human consumption to alleviate joint pain and other aches<sup>11</sup>**

**Egg shell use as a coffee sweetener<sup>11</sup>**
