

Our Mission

Accelerate the expansion of the agricultural economy by empowering expanded uses and markets of agriculturally derived products

MN meat processors eligible for free benchmarking tool

AURI is helping Minnesota's local and regional meat processors strengthen their bottom line through confidential operational benchmarking. This no-cost opportunity allows plants to compare financial and operational performance with industry peers, identify productivity efficiencies, and make data-driven decisions. Funded by the State of Minnesota, the program includes a free subscription and a stipend for participating processors.

New report explores potential of winter camelina

MBOLD released a new report offering environmental and agronomic insights on winter camelina, a promising winter annual oilseed crop. The analysis highlights camelina's potential to support soil health and sustainable intensification, and aims to inform growers, agronomists, supply chain partners, and policymakers as they evaluate its fit for diversified production systems. The report was funded with support from the Builders Initiative.

Thought leaders gather at MN Renewable Energy Roundtable

Last month's Minnesota Renewable Energy Roundtable brought together an engaged audience of approximately 150 energy, agriculture, and policy leaders to explore Minnesota's biogas future and preview AURI's upcoming 2026 biogas roadmap. Held at the Machine Shop in Minneapolis, the event's keynote speakers and interactive panels sparked dynamic discussions on agriculture's potential fit with biogas systems, policy innovation, and waste-to-energy opportunities, underscoring Minnesota's momentum toward a cleaner, more resilient renewable energy economy, while creating new opportunities for the agriculture sector.
